

# Annual Benchmark Report

Promoting financial inclusion through data and insight

**Bangladesh FY 2015** 

By Mohita Khamar and Deepika Kumari

#### **Acknowledgement**

MIX is privileged to showcase the results for Fiscal Year 2014 and FY 2015 of Bangladesh in the form of the "Annual Benchmark Report FY 2015". This report presents the financial and operating data of 34 Financial Service Providers (FSPs) that have reported to MIX Market during FY 2015.

MIX is grateful to all the FSPs that have provided comprehensive data in a timely manner. MIX would not be able to contribute to building transparency in the microfinance sector without their continued support and effort.

Disclaimer: This publication is available for use in research and analysis. Data and content may only be used for non-commercial purposes. If the material is published or distributed, it should be attributed to MIX with the appropriate citation.

MIX has taken due care and caution in preparing this report, it has obtained the information from the institutions. Thus MIX relies on the information submitted and does not guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors in transmission.

#### Introduction

**The Annual Benchmark Report** is one of the primary benchmarking products created by MIX that offers a unique opportunity to analyze **the performance of individual financial service providers (FSPs) and peer groups, and to conduct country comparisons**. As part of our continued efforts to collect and publish high quality data that strengthens the microfinance sector, builds transparency and further enhances financial inclusion in Bangladesh, we at MIX have created the "Annual Benchmark Report" for FY 2015.

This report includes **key financial and operational indicators** that provide a country overview, indicator level performance and institutional details. The indicators include a range of performance variables pertaining to outreach, institutional characteristics, financing structure, financial performance, revenue, expenses, efficiency, productivity, risk and liquidity. **The numbers are presented at the aggregate level, peer-group level and individual FSPs level**. The report also compares the FY 2015 performance against the previous fiscal year and provides the growth or decline rate for each of the indicators.

The publication of global industry benchmarks and customized benchmarking services create comparative performance results that the industry and its retail institutions can contextualize FSP performance within relevant peer groups. These benchmarks allow institutions to view relative trends and drivers in their own performance from a comparative perspective.

The benchmarks support the transparency necessary for improved institutional performance and greater access to capital markets for growth. The first section of each of the following pages captures the **overall performance of the FSPs in the country**. Each following section then explores the relative diversified peer comparison by the **legal types in the country and scale of the FSP**.

#### **About MIX**

MIX envisions a world where appropriate and accessible financial services are available to everyone, everywhere. We deliver strategically important data, insights, and market intelligence to key decision makers in the financial inclusion industry. Our online platforms – MIX Market and FINclusion Lab – enable coordinated investment, effective policy, and positive social outcomes for the financially underserved. Incorporated in 2002, MIX is a nonprofit based in Washington, D.C., with regional offices in Africa, Asia, Europe, and Latin America.

MIX Market provides access to the data, analysis, and tools that deliver key insights into the financial inclusion sector. Whether you are a financial service provider, investor, or policymaker, the MIX Market platform can help you assess financial, operational, and social performance.

We provide data, analysis, and market insight that enables coordination and transparency.

The last 5 years we had over

750,000 annual website visits

Our MIX Market platform provides instant access to financial and social performance information covering approximately

2,000 FSPs around the world Our FINclusion Lab platform provides insights into financial access across more than

22 countries.

#### **Data and Methodology**

- 1. The data and analysis in this report are based on self-reported operational and financial numbers for FY 2014 and FY 2015, for a total of 34 FSPs that submit data to MIX.
- 2. The financial numbers also are verified by the audited financial statements of the FSPs for FY 2014 and FY 2015 and are reclassified based on IFRS Standards.
- 3. The benchmark values have been presented across all the indicators and peer groups based on the average value in each category.
- 4. Balanced data: The growth value or the change in the indicator over the year is calculated based on balanced data, meaning for the FSPs that have reported consistently to MIX for 2014 and 2015 their values have been aggregated to present the percentage change.
- 5. Peer grouping information in based on the legal classifications that are relevant to the context of Bangladesh microfinance sector, that are Bank, NGO and Credit Union / Cooperative.
- 6. Peer grouping classification is also based on the scale of the FSPs i.e. **small** [GLP size less than USD 20 m], **medium** [GLP size between USD 20m to 80m] and **large** [GLP size greater than USD 80m].
- 7. MIX follows global industry standard definitions and formulae that are used for all analyses in the report. (Refer the glossary for the details of all the definitions and ratios used in the publication)
- 8. 25th and 75th Percentile: The smallest observation that is greater than or equal to the specified percentage of observations. In this report the 25th and 75th percentiles are displayed, to signify the upper and lower bounds of the middle 50% of FSPs' values for each indicator.
- 9. Average and Weighted Average Value (WAV) **Average value** is presented as a line in the "benchmark graphs by peers". **Simple average** is presented when an indicator is an absolute number whereas **weighted average** is presented when the indicator is a ratio.

#### **Key Findings**

#### **Industry Overview**

Over the years Bangladesh has seen good development in financial inclusion which addresses both access and usage of financial products. Many policies were formed which include the introduction of mobile financial services, banks to open at least fifty percent of their branches in rural areas, the introduction of agent-based banking to provide banking services in the remotest areas, floors on credit to the agricultural and rural sectors backed by credit refinancing lines on concessional terms, support to SMEs and women entrepreneurs etc. The majority of the credit to such changes goes to the microfinance institutions operating in the country due to their wide outreach and interest in social development.

The interest rates charged by FSPs are much lower than those charged by informal money lenders; they still have room to reduce rates further while realizing sufficient returns. In 2011, Bangladesh's Microcredit Regulatory Authority (MRA) capped the interest rate that MFIs can charge as high as 27 percent; however, many poor households still could not afford to borrow at this rate. Lowering this interest rates cap was expected to increase the number of poor households who are now able to take advantage of the benefits of microfinance programs.

#### **Financing Structure**

Debt to equity ratio has slightly improved as compared to FY 2014 which is majorly attributed to the increase in the net profit and paid in capital of the FSPs.

Deposit to loan ratio hasn't witnessed much difference as compared to FY 2014 in FY 2015, deposits have grown by 18.5% whereas the loan portfolio has grown by over 23.9%, which lead to a decline in the deposit to loan portfolio of 4.7%.

#### **Financial Performance**

Banks, credit unions/co-operative have registered a loss in FY 2015 whereas NGOs have registered slightly improved profit hence the return on asset and return on equity has also slightly improved as compared to FY 2014.

With the increase in total branches the number of staff, fixed assets have also increased which has resulted in the increase in personnel expense, depreciation, and administrative expenses, henceforth the operating expenses have also increased but are not of much worry as the operational self-sufficiency still remains almost the same as compared to FY 2014.

#### **Institutional Characteristics**

In total, 34 institutions reported data to MIX; the split of which is: 32 are NGOs, 1 bank, 1 credit union/cooperative.

The total number of offices reported by these 34 institutions in FY 2015 is 13,050 which has increased by 3.2% as compared to FY 2014 but the number of personnel employed by these 34 institutions has increased by 6.7% which shows that there hasn't been much infrastructural movement in the industry in last one year. The number of loan officers, on the other hand, increased more than 10% as compared to 6.7% increase in personnel stating the movement at the ground staff to expand their outreach in the sector.

#### Outreach

The actual growth in active borrowers as compared to FY 2014 was 8.5% whereas the actual growth in the gross loan portfolio was 23.9% and the average loan balance correspondingly increased by 14.3% where all the FSPs by scale have reported higher average loan balance compared to previous year.

FSPs in Bangladesh have registered a growth of 10.6% in the number of depositors whereas the growth in deposits was higher in comparison at 18.5% that gives FSPs liquidity to increase their lending operation.

#### **Productivity and Efficiency**

As the number of loan officers has increased the personnel allocation ratio has also improved as compared to FY 2014, but with the increase in operating expenses has resulted in an increase in the cost per loan of the FSPs.

The borrowers per loan officer have dropped in total due to the drop in the reporting NGOs for the year however for banks and credit union/co-operatives, it has increased. Considering the larger base for NGOs the total values have reduced by 2.6%.

Benchmark Indicator R	eference

#### **Glossary**

Please refer to link [ https://www.themix.org/glossary ]to view the detailed glossary of MIX Market indicator and ratios.

#### Indicator names and its formulas:

Administrative expense / assets - Formula: (Administrative expense + Depreciation and amortization expense) / Average assets

Assets - Formula: Not applicable

Average assets - Formula: Mean value calculated on the basis of total assets between two consecutive periods, including monthly, quarterly and annual data if available.

Average deposit balance per account - Formula: Deposits/ Number of deposit accounts

Average deposit balance per depositor - Formula: Deposits/ Number of depositors

Average equity - Formula: Methodology of average calculation is same as explained for Average Assets.

Average gross loan portfolio: Methodology of average calculation is same as explained for Average Assets.

Average loan balance per borrower - Formula: Gross loan portfolio/ Number of active borrowers

**B**orrowers per loan officer - Formula: Number of active borrowers / Number of loan officers

Cost per borrower - Formula: Operating expense/ Average number of active borrowers

Debt to equity ratio - Formula: Total Liabilities/ Total Equity

Deposit accounts per staff member - Formula: Number of deposit accounts / Number of personnel

Depositors per staff member - Formula: Number of depositors / Number of personnel

Deposits - Formula: Not applicable

Deposits to total assets - Formula: Total Deposits / Total Assets Deposits to loans - Formula: Deposits / Gross Loan Portfolio

**E**quity - Formula: Not applicable

 $\textbf{\textit{F}} in ancial\ expense\ \emph{/}\ assets\ \textbf{-}\ Formula:\ Financial\ expense\ on\ funding\ liabilities\ \emph{/}\ Average\ assets}$
